PROJECTS

E-Commerce Platform For Clothing :

Developed a comprehensive E-commerce platform aimed at providing a seamless online shopping experience for users. The platform encompasses a user-friendly interface with features such as product catalog browsing, user authentication, shopping cart management, and secure payment processing.

A Online Plant Nursery :
A separate website for plants helps customers to view various kinds of products. Is An E-Commerce Website is to provide features to customers like view descriptions, can comment on customization ideas, and can follow planting tips that promote gardening. The website recommends customers with the most purchased products, highest-rated products and recently added products.

Calculator :

A basic calculator using CSS, HTML, and JavaScript, you'll need to implement an interactive interface with buttons for addition, subtraction, multiplication, and division operations. The calculator should have a display screen to show user input and results. Utilize CSS grid system for button alignments.
